

"EnviroScape " is a groundwater demonstration designed to communicate the basic facts about groundwater and the connection between land activities and groundwater.

This "hands on" model can be adapted to teach kindergardeners as well as adults. Students are asked to think about where our water comes from, point and non-point sources of pollution are explained and better ways to protect our enviroment are presented.

The EnviroScape takes approximately 30 minutes to demonstrate.

Contact Penny Morgan or Jeanette Fuller at (910)947-5183 ext.3 to schedule a demonstration.
